Senior Expo on March 9th from 4:30-6:30pm in the College Union.

Corrine Long, a Small Business/Entrepreneurship major at Oregon Tech, is completing her senior project with the ASPIRE program at Mazama High School. This program is designed to help students succeed in their post-educational plans. Corrine's goal for the project is to develop a mentorship plan to support the mission of this important community program. Senior projects are designed to challenge students with real world management problems, as well as give them the opportunity to gain industry experience prior to graduation. Learn more about her results at the Business-Management Senior Expo on March 9th from 4:30-6:30pm in the College Union.

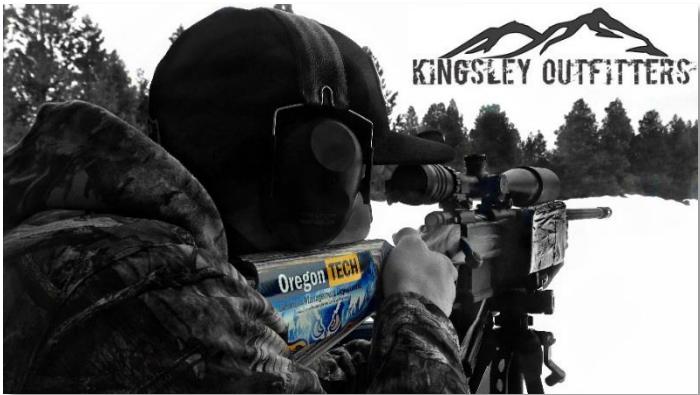

Robert Mulcare, a Marketing major at Oregon Tech, is completing his senior project on Steen Sports Park in Klamath Falls. Mike's Fieldhouse at the Park is a 60,000 square foot, multi-purpose facility that is under-utilized and is a "Hidden Gem." Robert's project will focus on developing a strategic plan for this facility to increase its utilization. Senior projects are designed to challenge students with real world management problems, as well as give them the opportunity to gain industry experience prior to graduation. Learn more about his results at the Business-Management Senior Expo on March 9th from 4:30-6:30pm in the College Union.

Susana Panuco and **Raena Rodgers**, Operations Management and Marketing students at Oregon Tech, have joined this year's Baja team. Each year, the students from the mechanical engineering program build, test and race an off-road vehicle that competes against other university teams. This year, the team reached out to business students to develop marketing and business plans for the competition. Susana is project manager and has been assigned to creating a project proposal that will facilitate the planning, execution, and closing of the project. Reana is developing a marketing plan to be used in the competition. The students hope this cross-discipline approach will yield great results in this year's competition. Senior projects are designed to challenge students with real world management problems, as well as give them the opportunity to gain industry experience prior to graduation. Learn

6:30pm in the College Union.

April Schneider, a Health Care Management major at Oregon Tech, has been completing her senior project with Shasta Community Health Center. The focus of this project is on the implementation of a centralized check-in and patient quality improvement measures. April finds it is a great opportunity to work with SCHC, as it ranked as one of the top 1% of health centers in the United States by the Health Resources and Services Administration. Senior projects are designed to challenge students with real world management problems, as well as give them the opportunity to gain industry experience prior to graduation. Learn more about their results at the Business-Management Senior Expo on March 9th from 4:30-

What is life like in a city built for people rather than cars? In this ethnographic documentary, anthropologist Mark Neupert explores life at the human-scale in Leiden, the Netherlands, examining how urban planning principles, such as mixed use, walkability, bikeability, and public spaces create a good human habitat. Filmed over the course of a year, this film shows modern life in an old urban pattern and looks at the connection between urban design, physical activity, and the sense of community.

Derek Scott, a Marketing major at Oregon Tech, has been working for filmmaker/professor Mark Neupert to market his film "Cobblestone Stories." The film explores the relationship between the people of Leiden, the Netherlands and their old urban environment. Derek's project focused on developing a marketing kit for the film which includes a website, social media sites, copyright protection and distribution plan. Senior projects are designed to challenge students with real world management problems, as well as give them the opportunity to gain industry experience prior to graduation. Learn more about his results at the Business-Management Senior Expo on March 9th from 4:30-6:30pm in the College Union.

Michael Smith, an Operations Management major, is completing his senior project in conjunction with clients Wendy Ivie and Heather Smith of the OIT Registrar's Office. The focus of his project is to reduce or eliminate the number of occurrences of registration errors currently affecting the OIT-Seattle program. The goals of this project are to streamline the registration process at OIT-Seattle, improve workflow between the two campuses, and to create a more user-friendly registration process for OIT-Seattle students. Senior projects are designed to challenge students with real world management problems, as well as give them the opportunity to gain industry experience prior to graduation. Learn more about his results at the Business-Management Senior Expo on March 9th from 4:30-6:30pm in the College Union.

Zaine Stapleton, an Operations Management major at Oregon Tech, is currently completing his senior project for Columbia Machine in Vancouver Washington. Columbia deals with the concrete product industry supplying all necessary components to run a block production plant. This project focuses on a Lean management initiative to restructure the maintenance department to provide better availability for in-house manufacturing and material moving equipment. Senior projects are designed to challenge students with real world management problems, as well as give them the opportunity to gain industry experience prior to graduation. Learn more about his results at the Business-Management Senior Expo on March 9th from 4:30-6:30pm in the College Union.
